Build by LuIS

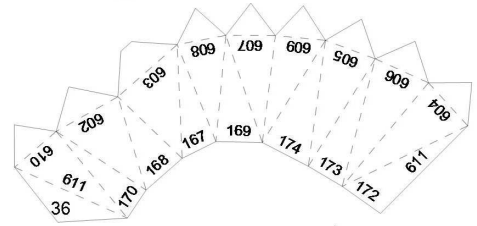

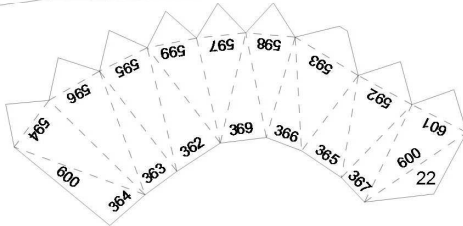

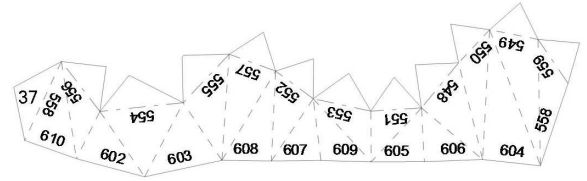

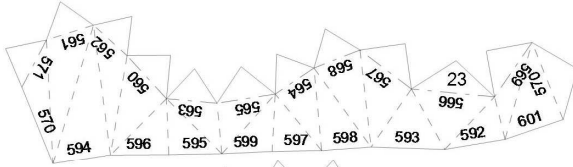

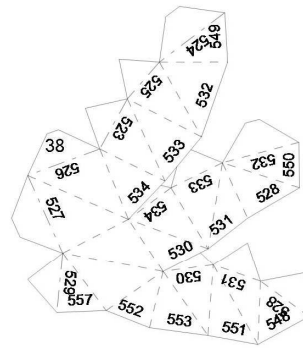

MARVEL
PAPERCRAFT

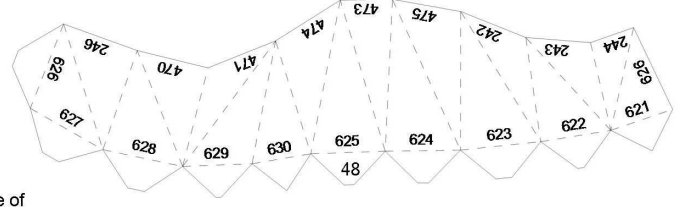

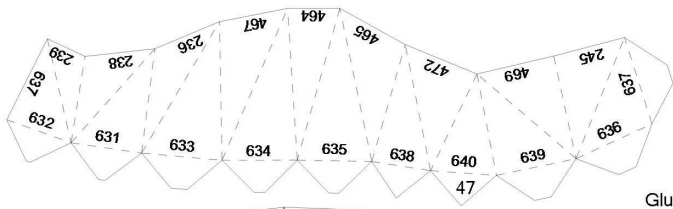

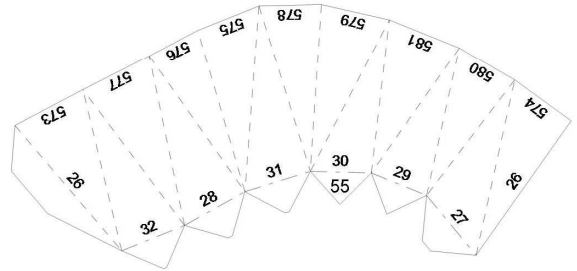

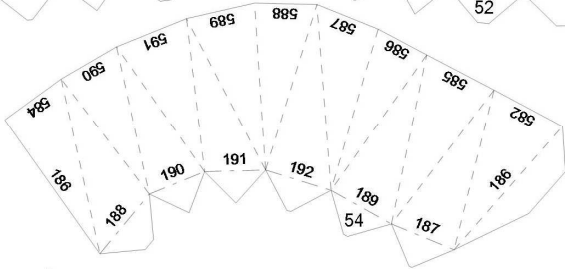

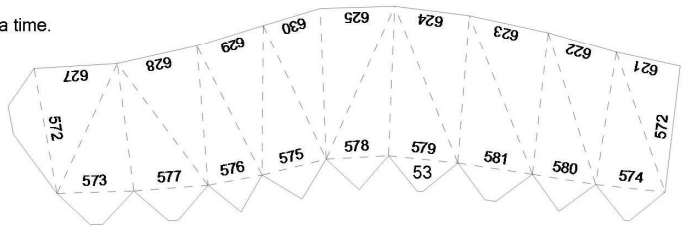

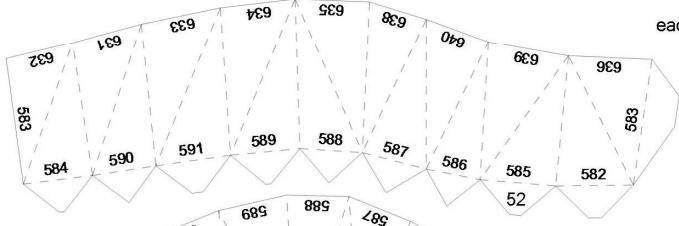

Glue the tumbs to the palms BEFORE gluing the fingers.

Refer to the pdo for the fingers, they are the hardest part of the model. Start gluing the fingers to the palm by the tab closer to the thumb on the upper side.

Glue one side of
each leg at a time.

Close at the bottom
of the feet. You
might wanna put some
weight inside, it can
fall with wind.
