Start at the top  
of the head, add the  
horns as you go.

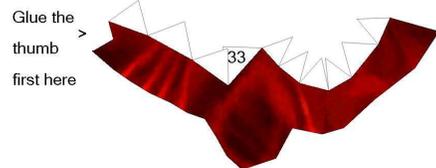

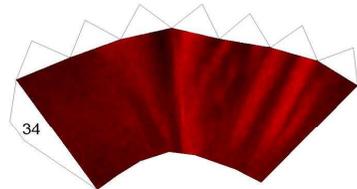

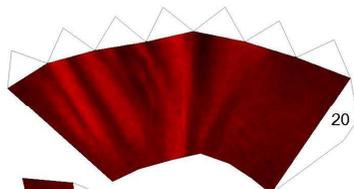

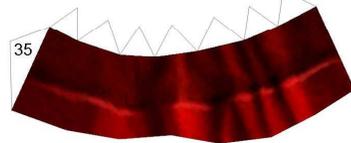

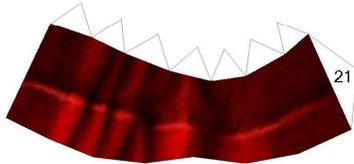

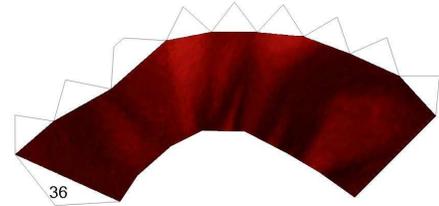

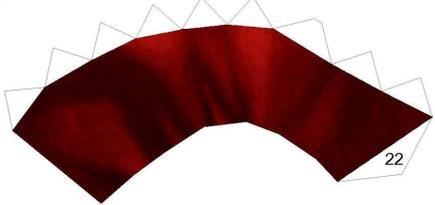

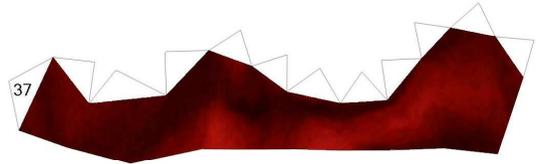

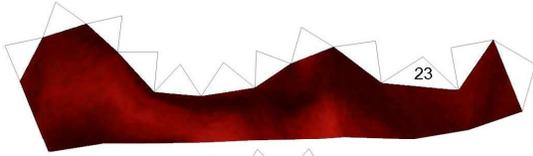

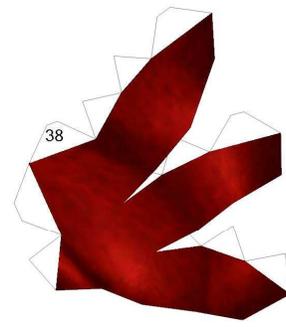

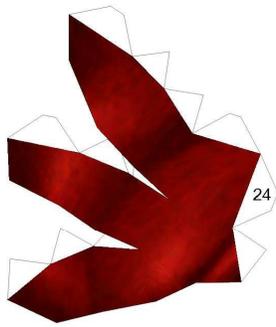

Be careful with the nose,  
eyes and mouth, they can  
get tricky,

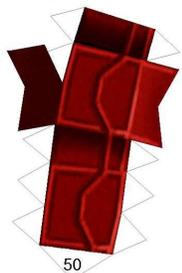

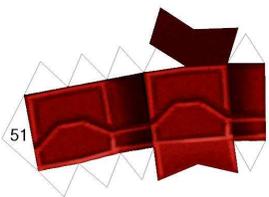

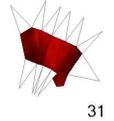

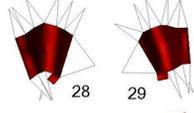

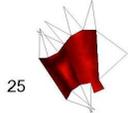

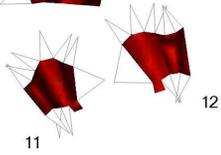

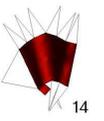

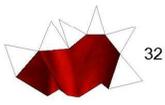

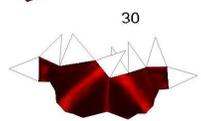

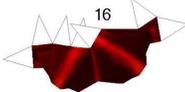

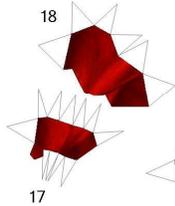

Glue the thumbs to the palms BEFORE gluing the fingers.

Refer to the pdo for the fingers, they are the hardest part of the model. Start gluing the fingers to the palm by the tab closer to the thumb on the upper side.

Glue the details on the sides while you can still apply pressure from the inside.

Glue the other side of the belts to the back of the buckle.

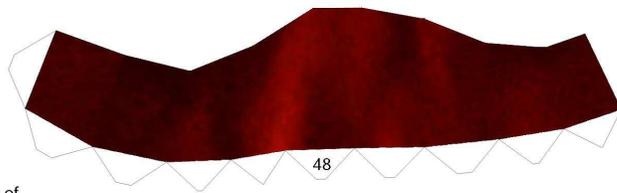

You can either glue the sticks to the hands or use magnets inside them and the palm of the hands.
