

Rowlet

By Brandon

Build by LuIS

Paper Pokés
www.pokemonpapercraft.net

Close at the top of the head.

After all is built, place the feet on a flat surface and apply glue to the body, where it connects to the feet and place on top. You can angle to body as you want, if you want a standing model as shown in the pdo, you'll need to put something below the tail as the glue dries.

Close the feet at the back of the bottom piece.

Start the gluing the feathers starting at the front, one side at a time. Build 13 (tail and two feather pieces) before gluing it to the body.
