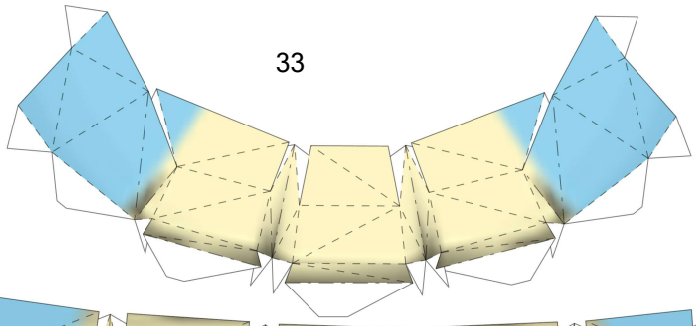
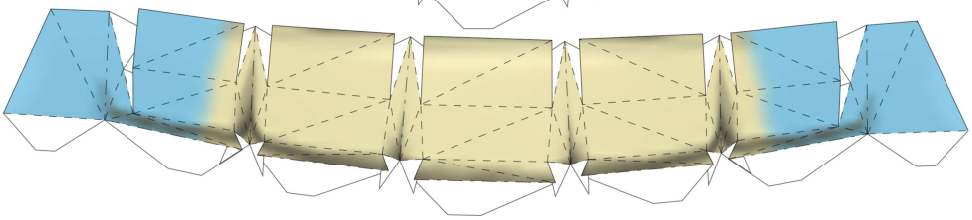
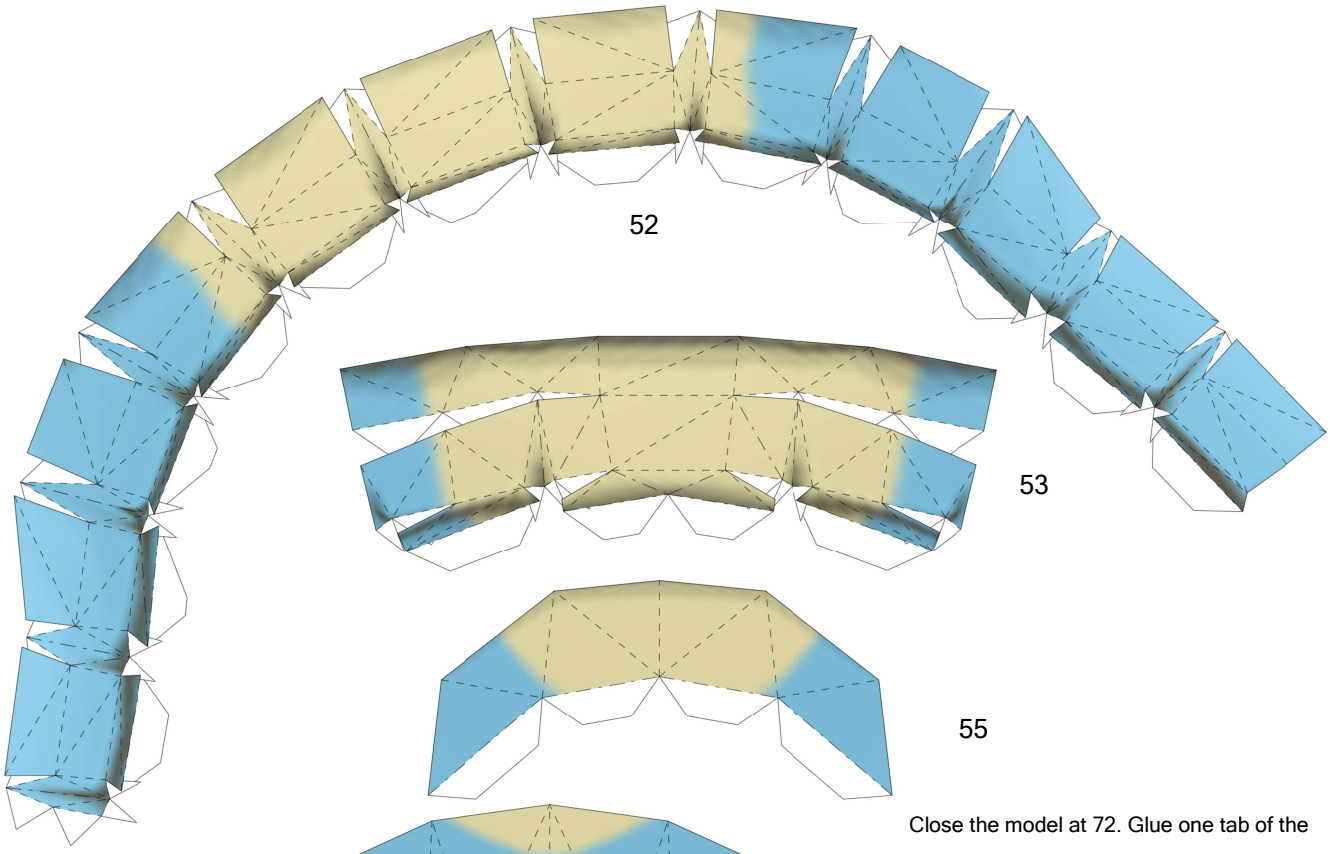
Build 33, 34, 52 and 53
to themselves before
gluinging them to the body.



33



34

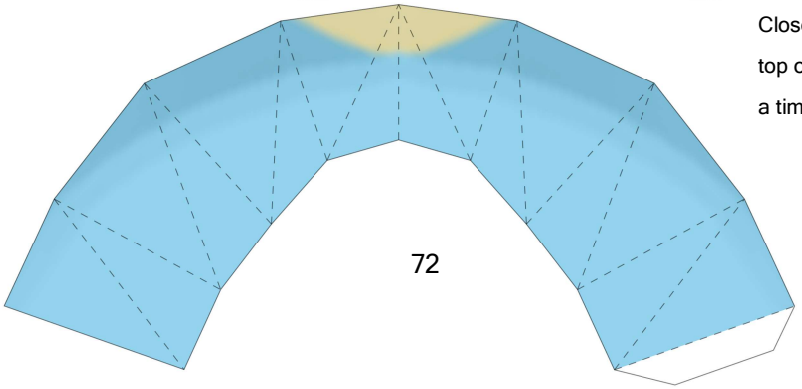


52

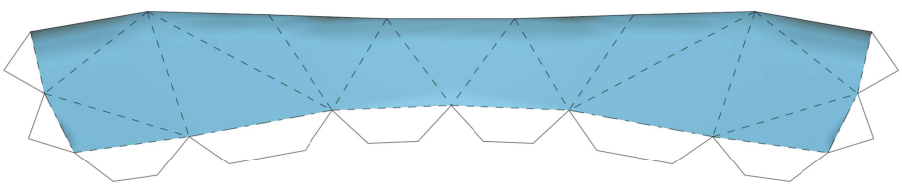
53

55

Close the model at 72. Glue one tab of the
top of the body and one tab of the tail at
a time. I didn't need wight to make it stand.



72



54

Glue the first two tabs of 56 and 58 to themselves, than go to 57 and 59, and glue them to 57 and 58. After that, start gluing both sides of the tail together starting with 60. You may need to use the .pdo as reference.
