There are some folds, on the head and fins in special, tha need to be made to get a smooth result. Use the pictures, .pdo and Edge ID .pdf as reference.

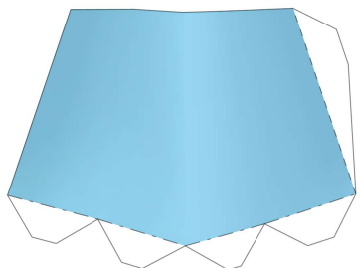

The image displays ten numbered blue paper models for a dragon-like creature. The models are: 1. A large, curved wing with a complex, multi-faceted shape. 2. A large, curved wing, similar to model 1 but with a different internal structure. 3. A Y-shaped fin or tail piece with a central vertical fold. 4. A long, curved fin or tail piece with a complex, multi-faceted shape. 5. A long, curved fin or tail piece, similar to model 4 but with a different internal structure. 6. A head piece featuring a large, stylized eye with a black pupil and a grey iris. 7. A head piece, similar to model 6 but with a different eye design. 8. A small, curved fin or tail piece. 9. A small, curved fin or tail piece. 10. A large, curved fin or tail piece with a complex, multi-faceted shape.

Build 33, 34, 52 and 53
to themselves before
gluing them to the body.

72

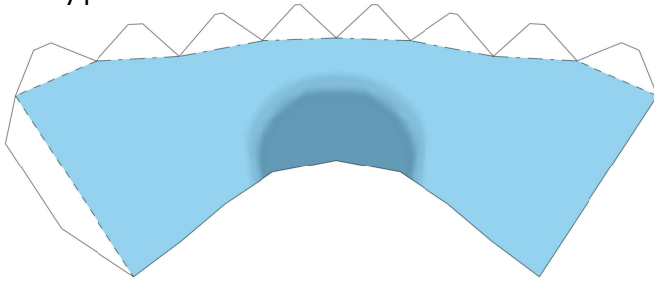

Close the model at 72. Glue one tab of the
top of the body and one tab of the tail at
a time. I didn't need wight to make it stand.

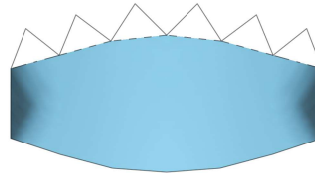

54

Glue the first two tabs of 56 and 58 to themselves, than go to 57 and 59, and glue them to 57 and 58. After that, start gluing both sides of the tail together starting with 60. You may need to use the .pdo as reference.
