The diagram shows two parallel chains of 10 sites each. The top chain's sites are labeled 148, 174, 172, 170, 169, 144, 145, 146. The bottom chain's sites are labeled 141, 142, 143, 144, 145, 146. Dashed lines connect adjacent sites in each chain (nearest-neighbor interactions) and connect corresponding sites between the two chains (inter-chain interactions).
